

NATIONAL  
**BurnsAwareness**  
MONTH

To Whom It May Concern;

**National Burns Awareness Month**

National Burns Awareness Month (1-30 June), has been established by the Julian Burton Burns Trust and Burnaid® to raise awareness of the correct first aid treatment for minor burns - cool running water for 20 minutes.

As an extension to our successful South Australian early learning burns education program, BurnSafe Junior, we are assisting all services nationally to provide correct burns first aid knowledge to their children. Please use the provided materials to create an activity with the children who attend your service to increase awareness of correct burns first aid. In addition to this you can find activity ideas in the 'Further Planning for Educators' document.

The activities include teaching the children to learn the 'Cool Drop' song available on YouTube (and making up your own actions) with a follow up colouring-in sheet and a first aid steps colouring-in sheet. The children can then take their colouring-in home so their family can also be reminded of the correct first aid for minor burns.

Thank you in anticipation of your involvement with the 2017 National Burns Awareness Month.
